3. Term:

This is a two year term contract from (7/1/09) to (6/30/11) with three (3) additional mutually agreeable 1-year options for renewal through (no later than) 6/30/14. 6. Acceptance by the County:

It is expressly understood and agreed that all materials provided and related work done by the Vendor shall be subject to inspection and acceptance by the County at its discretion, and that any progress inspections and approval by the County of any item or work shall not forfeit the right of the County to require the correction of faulty workmanship or material at any time during the course of the contract, although previously approved by oversight. Nothing herein contained shall relieve the Vendor of the responsibility for proper delivery of materials required under the terms of this Contract until all materials have been accepted by the County.

2: Additional Features

Electronic file transfers
On-line card management
Customized account set-up
Local Customer Service, 24/7
Alternative Fuels available at locations within Reno and Sparks
New cards, lockout cards, and replacement of cards at no cost

3. RFG Storage at Sparks Terminal

Our Sparks Terminal has adequate inventory on hand at all times through our new 20,000 gallon RFG storage tank. RFG is transported via truck from Sacramento and held as inventory at our Sparks Bulk Plant, where the product is then transported to its final destination of City, County and Cardlock facilities. MSDS sheets are available as needed.

4. RFG Implementation to Cardlock Facilities

The process of getting product into the Cardlock Facility at 175 Nugget Ave, Sparks will take effect immediately. So there is no interruption of alternative fuel purchased for the City of Sparks, our goal will be to have RFG in place before April 1, 2009.

5. Emergency Fueling Provision

Western Energetix and Gulf Transportation fully utilize 50 tankers, tank wagons and bobtail trucks in Nevada 24 hours a day. Our largest concentration of tankers and trucks is 20 vehicles at the Sparks Terminal. In the event of a state or local emergency, cardlock government agencies are our first priority. Western Energetix will draw upon the resources of tank wagons, bobtail trucks and retail locations for fuel inventory.

Manual Nozzles

In the event of a prolonged power outage, Western Energetix has nine 12VDC specially manufactured fuel nozzles that can be installed and used to dispense fuel from our tanks in the ground at a flow capacity of approximately 15 to 20 gallons per minute. Nozzles are stored for use at our unattended cardlock locations in Sparks, Reno and Carson City cardlock facilities.

Western Energetix maintenance personnel stationed in Sparks are trained and authorized to install and operate this equipment. We require two hours per location to install manual nozzles. Once installed, two Western Energetix personnel can operate each nozzle. In the event that there is a prolonged power outage and we receive notification that assistance is required, Western Energetix will make its best efforts to respond, travel, set up, and operate our 12v pumps where needed for emergency vehicles only. To ensure all available fuel is reserved for emergency use, no other private vehicles will be allowed to fuel while the power is out and manual nozzles are in place. Ideally, an armed guard would be on site to turn away private and non-emergency vehicles.

A note about text messaging: It is advisable to train all employees who have cell phones to use the SMS text-message feature on their mobile phones and have emergency communications plan numbers available or stored in their cell phones. Text messages can be sent and received when regular cell phone service is overloaded or intermittent.

A list of emergency contact names and numbers will be provided upon request.

Western Energetix looks forward to continuing a business relationship with the Douglas County. Should you have any further questions, please feel free to contact me at 775-889-1234, ext. 2633.

Sincerely,
