2. INDEPENDENT CONTRACTOR STATUS. The Parties agree that Contractor shall have the status of an independent contractor and that this Contract, by explicit agreement of the Parties, incorporates and applies the provisions of NRS 333.700 et. al., as necessarily adapted, to the Parties, including that Contractor is not an employee of the County and that

There shall be no:

- (1) Withholding of income taxes by the County;
- (2) Industrial insurance coverage provided by the County;
- (3) Participation in group insurance plans which may be available to employees of the County;
- (4) Participation or contributions by either the independent contractor or the County to the public employees retirement system;

- (6) Unemployment compensation coverage provided by the County if the requirements of NRS 612.085 for independent contractors are met.

3. INDUSTRIAL INSURANCE. Contractor further agrees that prior to the commencement of any work and as a precondition to any obligation of the County to make any payment under the Contract, the Contractor will provide the County with a work certificate and/or a certificate issued by a qualified insurer in accordance with NRS 616B.627. If such meeting does not resolve the dispute, litigation may only proceed before a federal northern Nevada district court in the State of Nevada. The court will recognize any offers of judgment made by a Party pursuant to Nevada law. The Contract Documents shall include this document and Exhibit A, hereto. The Contract Documents are intended to be complimentary to one another and shall be so construed. 14. INDEMNIFICATION. Contractor agrees to indemnify and save and hold the County, its agents and employees harmless from any and all claims, causes of action or liability arising from the performance of this Contract by Contractor or Contractor's agents or employees.

Re: Johnson Lane Wash – Culvert Crossing Design

Dear Ms. Walker,

Thank you for requesting professional services from JE Fuller Hydrology and Geomorphology, Inc. (JE Fuller). It is our understanding that Douglas County would like to upgrade the culvert crossing at Nye Drive at Johnson Lane Wash. The new culvert crossing will be designed to convey the runoff from the 100-year flow event with the post-construction water surface elevation contained within the existing drainage easement. Based on this information provided, JE Fuller anticipates the engineering services to analyze and design the culvert crossing with 30% Design Plans will cost **\$18,132.00**. The scope of work (SOW) presented below outlines tasks involved and an estimated fee schedule.

TASK 1- DRAINAGE DESIGN

TASK 1.1 – CULVERT ANALYSIS

Using the results from the existing FLO-2D Model for Johnson Lane Wash, JE Fuller will analyze a culvert designed to convey the 100-year runoff. The methodologies used to will be in accordance with those acceptable by Douglas County.

TASK 1.2 –SCOUR ANALYSIS

JE Fuller will determine the scour for Johnson Lane Wash at the location of culvert. The scour depth will be utilized in the design of the bank protection.

TASK 1.3 – SPLASH PAD ANALYSIS

Based on the culvert hydraulics determined within Task 1.1, JE Fuller staff will determine the splash pad length, width and rock size.

TASK 1.4 – POST-CONSTRUCTION MODELING

Using the combination of the FLO-2D model from Task 1.1 and the proposed crossing structure data determined through the analyses (Task 1.1 – Task 1.3), JE Fuller will develop a post-construction model to evaluate the efficiency of the structure.

TASK 1.5 – TECHNICAL MEMORANDUM

JE Fuller will prepare a brief technical memorandum that describes the analyses used for the drainage design. The memorandum will be submitted to Douglas County for review. It is assumed that there will be one round of review comments before finalizing the memorandum.

TASK 2- DRAINAGE DESIGN PLAN (30% LEVEL)

JE Fuller will prepare drainage design plans that will be used as the basis for the construction of the new culvert crossing. The plans will be assumed to be at level consistent with those typically referred to as 30% levels. The plan will provide concept details and basic notes and specifications that will assist the contractor in construction of the crossing.
